# UDL AND CIDI LABS TOOLS

## RESOURCES

**DesignPLUS** provides the tools to [design and scale](#) UDL guidelines in your Canvas courses. Leveraging the power of [Templates](#), Action Items, and Module Builder you can create entire courses with UDL aligned guidance, examples, and structures built in.

**TidyUP** helps ensure learners are accessing the correct, up-to-date content and allows you to quickly organize course files and verify that files and content are descriptively named—all to support learner agency and access to important course content. Plus, removing unused files boosts course accessibility.

**UDOIT Advantage** gives course wide (or account-wide) insight to content and file accessibility and makes it easy to remediate all accessibility issues in a course from a single screen. UDOIT Advantage also promotes learner agency by providing student access to alternate file formats to meet their varying needs.
